

## Sprint 3 Plan

### Medicine Tracker

#### Pill Slugs

Sprint completion date: 11/16/2021

Goal: For our third sprint, we would like to have our MVP completed.

#### Task Listing:

1. As a user, I want to be able to see a description of the medication that I take.
  - a. Display detailed information on common types of medicines (5 hours)
  - b. Users should be able to create the description of their medicine (7 hours)
  - c. Total Hours: 12 hours
2. As a doctor/guardian with their own account, I want to be able to view my patient's/child's medicine charts as well.
  - a. Share information between accounts if permission is granted (15 hours)
  - b. Be able to view other account's information (15 hours)
  - c. Total Hours: 30 hours

#### Team Roles:

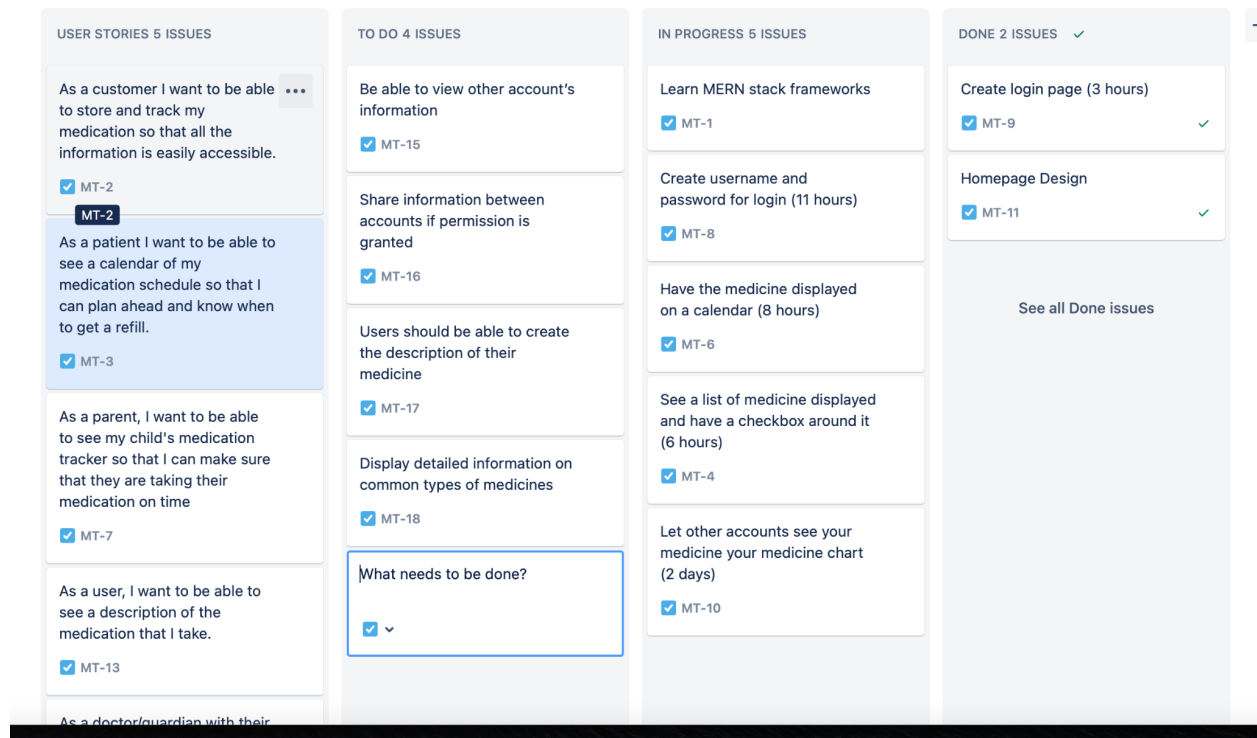

- Scrum Master - Dylan Nehoray
- Project Manager - Christopher Lim
- Developers - Artyom Martirosyan, Alex Kinder, Juan Lee, Gavin Aguinaga

#### Initial Task Assignment:

- Christopher Lim:

- Help connect the backend and frontend
  - Design some of the user interface with React components
- Dylan Nehoray:
  - Learn frontend part of the project to be able to connect it to the backend
  - Help implement the event model for calendar usage
- Artyom Martirosyan:
  - Work on integrating medication into the medication list.
- Alex Kinder:
  - Learn backend part of MERN stack framework
  - Start implementing event model in backend
- Juan Lee:
  - Learn React and Material UI
  - Learning/implementing the connection of frontend and backend
- Gavin Aguinaga:
  - Learn backend part of MERN stack framework
  - Start implementing event model in backend
  - Learning/implementing the connection of frontend and backend
